

Demand Planner

Tasks & responsibilities:

As demand planner, you are responsible for the right products, right materials, at the right place at the right time. You coordinate with your colleagues at orders desk, logistics, external partners for timely delivery, stock availability, air or ocean freight arrangements, import and export duties etc. Your colleagues and contacts are located in Europe, Asia and the Americas and you report to the Manager planning, inventory and logistics in our EMEA headquarters in Enschede, The Netherlands.

Your skillset:

- Bachelor degree preferable in the field of logistics.
- Experience in a similar position and work environment.
- Good command of the English and Dutch language.
- Experienced user of ERP systems and Excel.
- Analytical, hands on, structured, flexible and able to work under pressure.
- Positive attitude, sense of humor and problem solver.

Why UEI is the place to be:

The opportunity to join a global company with various logistic challenges all over the globe. A spider in the web role between departments locally and globally. Join a team that has a true passion for innovation and technology. Those passions resonate worldwide throughout all of UEI's locations with talented employees.
